# Functional & Performance Testing Template

## Performance Test

| | |
|---|---|
| Date | 29 September 2026 |
| Team ID | SWTID-2026-7872 |
| Project Name | Implement Client Script and UI Policy (Incident) |
| Maximum Marks | |

**Test Scenarios & Results**

| Test Case ID | Scenario (What to test) | Test Steps (How to test) | Expected Result | Actual Result | Pass/Fail |
|---|---|---|---|---|---|
| **FT-01** | Mandatory Fields via UI Policy | Open a new Incident, leave Caller and Short description empty and click Submit | Form is not saved; both fields are shown as mandatory | | |
| **FT-02** | Conditional Mandatory Fields (UI Policy) | Set State to Resolved and leave Close code and Close notes empty | Close code and Close notes become mandatory; save is blocked until filled | | |
| **FT-03** | onChange Client Script | Change the Category value on the Incident form | Subcategory is cleared and the configured message is displayed | | |
| **FT-04** | onSubmit Client Script | Enter a Description shorter than 20 characters and click Submit | Submit is blocked and an error message is shown | | |
| **PT-01** | Form Load Time Test | Use a timer to check Incident form load time with all scripts and policies active | Should be under 3 seconds | | |
| **PT-02** | GlideAjax Response Test | Change Caller several times quickly and observe the server call | Script Include responds without slowing the form | | |

| | | | | | |
|---|---|---|---|---|---|
| | | response | | | |
| **PT-03** | Concurrent Form Load Test | Open multiple Incident forms at the same time | Forms work smoothly without errors or crashing | | |
