Project Planning Phase
Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	29 September 2026
Team ID	SWTID-2026-7872
Project Name	Implement Client Script and UI Policy (Incident)
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	UI Policy (Incident)	USN-1	As a service desk agent, I can see Short description and Caller marked mandatory when the Incident form loads, so no incident is saved without them.	2	High	
Sprint-1		USN-2	As an agent, I must enter Close code and Close notes when State is Resolved, so every resolution is documented.	3	High	
Sprint-1		USN-3	As an agent, I see resolution fields only when State is Resolved, so the form stays uncluttered.	2	Medium	
Sprint-1		USN-4	As an admin, I can make Number and Opened by read-only, so key fields cannot be altered.	2	Medium	
Sprint-1		USN-5	As an agent, I must enter an Assignment group when Priority is 1 - Critical, so critical incidents are routed immediately.	3	High	
Sprint-1		USN-6	As an agent, I must enter an On hold reason when State is On Hold, so waiting incidents are explained.	3	High	
Sprint-1		USN-7	As a tester, I can verify each UI policy reverses correctly when its condition is false (Reverse if false).	3	Medium	
Sprint-1		USN-8	As an agent, I must enter Caller details when Contact type is Phone.	2	Low	
Sprint-2	Client Script (onLoad / onChange)	USN-9	As a user, I see an info message when the Incident form loads (onLoad) reminding me of required details.	2	Low	
Sprint-2		USN-10	As an agent, when I change Category, Subcategory is cleared (onChange) so a stale value is not kept.	3	High	
Sprint-2		USN-11	As an agent, I get a warning when I set Priority to 1 - Critical (onChange).	3	High	
Sprint-2		USN-12	As an agent, I get an alert if the Impact and Urgency combination looks inconsistent (onChange).	3	Medium	
Sprint-2		USN-13	As an agent, I am asked to confirm before moving State to Resolved (onChange).	3	Medium	
Sprint-2		USN-14	As an agent, when I pick a Caller, their location and contact info auto-fill using g_form.getReference.	3	Medium	
Sprint-2		USN-15	As an agent, I see a message if Short description is too short (onChange).	3	Low	
Sprint-3	Client Script (onSubmit / GlideAjax)	USN-16	As a manager, I cannot submit an incident with a Description shorter than 20 characters (onSubmit).	3	High	
Sprint-3		USN-17	As a manager, I cannot resolve an incident without a work note (onSubmit).	3	High	
Sprint-3		USN-18	As an agent, I see a VIP warning when the selected Caller is a VIP, using GlideAjax and a client-callable Script Include.	5	High	
Sprint-3		USN-19	As an agent, I see the Caller's number of open incidents, returned by a Script Include.	3	Medium	

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-3		USN-20	As a user, I see consistent field and error messages (g_form.showFieldMsg / addErrorMessage).	2	Medium	
Sprint-3		USN-21	As an agent, I get validation when editing State in the list view (onCellEdit).	4	Low	
Sprint-4	Testing & Deployment	USN-22	As a tester, I can confirm UI policies and client scripts do not conflict (execution order).	3	High	
Sprint-4		USN-23	As a tester, I can verify behaviour across UI types (Desktop / Mobile / Service Portal).	3	Medium	
Sprint-4		USN-24	As an admin, I can capture all changes in an update set and move it to the test instance.	3	High	
Sprint-4		USN-25	As a developer, I can fix defects found during testing.	5	High	
Sprint-4		USN-26	As a service desk agent, I can complete UAT and give sign-off.	3	High	
Sprint-4		USN-27	As a team, we can document the configuration and a short user guide.	3	Medium	

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	05 Oct 2026	10 Oct 2026		
Sprint-2	20	6 Days	12 Oct 2026	17 Oct 2026		
Sprint-3	20	6 Days	19 Oct 2026	24 Oct 2026		
Sprint-4	20	6 Days	26 Oct 2026	31 Oct 2026		
Total	**80**	**24 Days**				

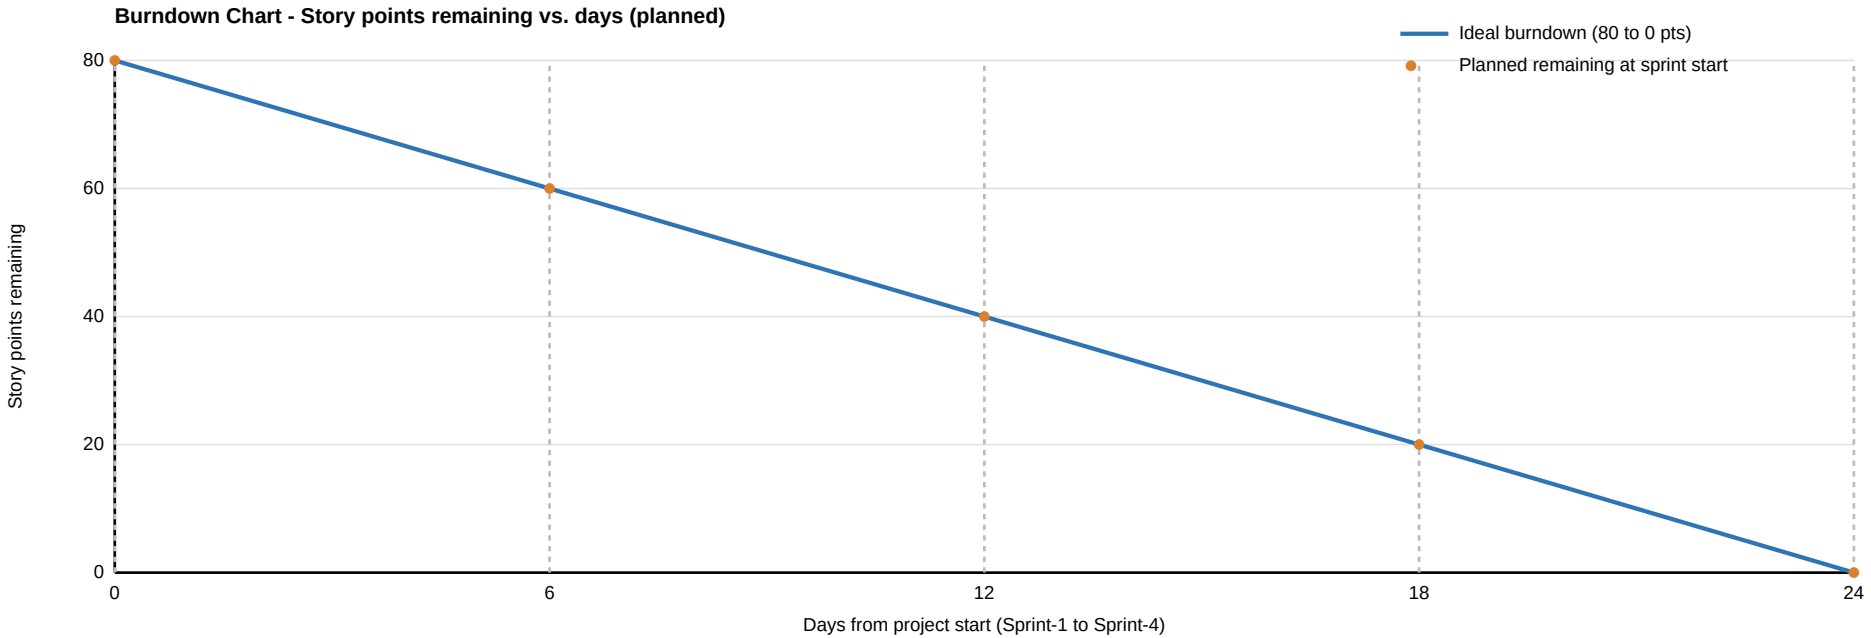
Velocity:

Our sprint duration is 6 days and the team velocity is 20 story points per sprint. The team's average velocity (AV) per iteration unit (story points per day) is:

AV = velocity / sprint duration = 20 / 6 ≈ 3.33 story points per day

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.



Total scope is 80 story points over 4 sprints; the actual remaining-work line is added as each sprint closes.
